

## Who is around your garden

**Objectives:** to find out who is living or working around the garden who might be interested to join you; to identify who is active in your area and could support you in reaching out to new target groups

Use a map and mark different points of interest:

- areas where people of your target group live or work
- neighbourhood and cultural institutions
- educational institutions
- churches

Think about ways, how to address the people and institutions you have mapped. Decide which steps to take first and share the work among your group.
